1st ERASMUS+ MOBILITY

2nd JUNIOR HIGH SCHOOL of AGRINIO

‘KOSMAS the AETOLIAN, GREECE

21st April,2024

Activity:DIGITAL SCAVENGER HUNT

Students from Poland, Romania and Spain together with the students from Greece took part in this attractive and engaging activity. While accomplishing the missions, they made friends and discovered some sights of Agrinio.

This activity was followed by ‘ice-breaking’ games inside the school. Students and teachers overcame cultural barriers and they became one ‘Erasmus Team.’

- Welcoming the guest countries;
- Meeting the guest teachers and students;
- Presenting songs;
- Recreating ‘The Lighting of the Olympic Flame’ by host students.

- Creating the ‘Logo and Slogan Competition’
- Creating the Calendar Erasmus- https://www.canva.com/design/DAGDH7_OXMg
- Participation of guest students at classes to find out about Greek educational teaching system.

Swallow Tweetings-worship spring\The activity was dedicated to spring. Greek hosts presented us an incursion in their traditions regarding the beginning of spring.

Students drew pictures with swallows which had just come back from their long migration. They sang together a song dedicated to spring and the rebirth of nature. They were accompanied by three professional musicians who played their traditional musical instruments. A parade took place from school to the city centre. Students and teachers also joyfully danced to the music.

Educational visit to the Archaelogical Site of Oiniades –Acheloos Delta
Visiting the National Park of Water Birds in Aetoliko
Visiting the Etching Art Museum of Vaso Katraki. We learned about how Greek history is illustrated in the art of engraving.

Educational visit and guided tour to Messolonghi Lagoon National Park .

The professional guide delivered an interactive activity with students on which occasion they learned about how important role the lagoon and delta played in the inhabitants' lives throughout the centuries: past-present-future

Interesting things were revealed to us about what an important role this region has had in providing a significant amount of salt throughout the time and how the extraction of salt from the sea has evolved. The museum itself was amazing

due to all the useful information we gained there while admiring the exquisite exhibits.
